A number of local and Pennsylvania-based degree programs appear on the U.S. News and World Report's 2021 rankings of best online programs.

Released Tuesday, these annual lists compare more than 1,600 online bachelor's and master's degree programs. According to the National Center for Education Statistics, nearly 3.3 million higher education students enrolled exclusively in distance education programs in fall 2018.

With the pandemic bringing virtual learning to the forefront, the lists have added importance. Note that they track programs that are 100% online and do not include programs that have adjusted to the pandemic by shifting to virtual.

"As in-person gatherings remain limited, we might see more interest in online degrees than in prepandemic years," said Anita Narayan, managing editor of education at U.S. News, in a statement. "But online degrees aren't only practical in the short term — distance education can also be conducive to a schedule that includes full-time work or other commitments."

Each online undergraduate and graduate degree program was scored across four categories, weighted like this:

Engagement — 35%

Services and tech — 25%

Faculty credentials and training — 20%

Expert opinions from surveys of high-ranking academic officials — 20%
